Chiesi USA & CobbleStone
Contract Insight® Enterprise Edition

Chiesi USA’s Challenges
Chiesi was faced with a few main challenges that initiated the implementation of contract management software.

One challenge was the fact that they were growing at an extremely rapid pace, making it harder to stay organized. Another pair of challenges that Chiesi endured, related to rapid growth, were the lack of an interactive system for contract lifecycle management and the lack of checklist and milestone management.

With their rapid growth and lack of means to manage the effects of this growth, it was a no-brainer to invest in a contract lifecycle management software system.

CobbleStone Software’s Solution
Chiesi chose CobbleStone’s Contract Insight because of its low-friction, scalable, and powerful functionality that met their most important contract management needs.

A few specific reasons why Chiesi chose Contract Insight to manage their contracts, as opposed to a different contract management provider, were because of the user-friendliness, high configurability, and cost effectiveness of CobbleStone Software. Furthermore, Chiesi assessed the services they received from CobbleStone Software. A senior paralegal at Chiesi stated that the quality of service received was, “stellar, [they] walked me through it step by step.”

CobbleStone seamlessly integrates with Microsoft Office applications including MS Word and MS Outlook, as well as supports online contract negotiations via an integration between MS Office 365 & CobbleStone Contract Insight.

Customer Benefits
Contract Insight contract management software helped Chiesi better handle their contract management issues. They were provided with a contract management software system (CLM) that allows them to successfully, efficiently, and proactively manage their contracts and meet (and even exceed) their unique needs. A senior paralegal at Chiesi also stated, “We have expanded the utility of CobbleStone in our business even more than we originally envisioned, and staff has always been helpful in getting us where we needed to go.”

CobbleStone Software offers award-winning SaaS (web-enabled) and on-site (deployed) contract management software solutions to assist companies in boosting revenue, reducing costs, increasing configurability, reducing friction, and mitigating risk.

CobbleStone’s contract management software suite – Contract Insight - enables organizations to effectively and efficiently manage their contracts through the entire contract lifecycle.
