COBBLESTONE software

DATASHEET

COBBLESTONE CONTRACT INSIGHT® EDITIONS DEEP DIVE

In today's fast-paced business environment, it goes without question that organizations' investment in the most effective solutions for managing contracts remains a priority. To that end, a solution for the efficacious management of contractual agreements, committals, procurements, and bids is paramount for streamlined operations and minimized risks.

CobbleStone Software offers a suite of comprehensive solutions tailored to diverse contract management and eProcurement needs. This datasheet delves into the three CobbleStone Contract Insight editions – outlining features and benefits that cater to organizations from small businesses to expansive enterprise in both the public and private sectors.

The Challenge

While navigating the complexity of contract management and eProcurement, organizations often grapple with a myriad of challenges. From drafting legalese and manually tracking renewals to mitigating risks and attempting to meet obligations, the absence of a robust CLM (contract lifecycle management) system can introduce inefficiencies and oversights. As businesses grow and evolve, the volume and intricacy of their contracts almost certainly amplify – necessitating a system that not only addresses current pain points but also possesses the scalability to accommodate future demands. Without the right edition of a CLM software solution, organizations risk operational contract lifecycle bottlenecks, error-laden legalese and clauses, legal repercussions, and missed opportunities for getting the most value and revenue out of their contracts.

The Solution

In a diverse landscape of business operations, one size does not fit all when it comes to choosing the right contract management and eProcurement solution. CobbleStone® has organizations' backs by providing a multi-tiered software offering in recognition of this diversity of needs. By offering three distinct versions of their award-winning contract management software, CobbleStone addresses the unique challenges faced by various enterprises. Whether a budding startup, a growing mid-level organization, or a powerful multinational corporation, there's a version of CobbleStone's solutions that aligns with organizations' unique requirements. This granularity allows businesses to invest in a solution that virtually ensures there is neither overspend on superfluous features nor a lack of necessary functionality. The subsequent scalability that allows organizations to flexibly transition between editions as they evolve promotes continuity – essentially eliminating disruptions in contract management and eProcurement processes as contract complexity and volume increase.

COBBLESTONE CONTRACT INSIGHT® EDITIONS DEEP DIVE

The Benefits

Managing your contract records can be time-consuming. CobbleStone Software's three editions are designed to cater to myriad needs and scale accordingly. Let's take a closer look at these editions.

Visit us at www.CobbleStoneSoftware.com to start your FREE 30-day trial and learn why thousands of users trust CobbleStone every day to help them manage their contracts!

1. **Express Edition:** This entry-level SaaS solution is tailored for teams that want to begin their CLM journey with only essential contract management features. With functionality like a basic contract repository, virtually unlimited user-defined fields, and email and calendar notifications, it offers an intuitive interface to get started with organized contract management without overwhelming users. This solution offers a seamless migration path for expanded features while reducing organizations' total cost of ownership. CobbleStone Contract Insight Express Edition is available as a SaaS/Cloud solution only.

2. **WorkGroup Edition:** Similar to Express Edition, this solution helps teams begin improving their contract management software journey with in-demand features. However, WorkGroup brings advanced tools to the table beyond fundamental contract management. Organizations can enjoy a vendor negotiation portal, advanced document templates, spend and cost control, document processing tools, and more. These more robust features foster collaboration and help growing teams remain efficient and well-coordinated. CobbleStone Contract Insight WorkGroup Edition is available as a deployed solution on-premise or on an organization's corporate cloud.

3. **Enterprise Edition:** A comprehensive, enterprise-level solution for organizations with a vast array of contracts to manage, this edition offers a significant myriad of advanced features. These features include VISDOM® contract artificial intelligence, machine learning, configurable contract analytics and reports, intelligent workflow automation, optional IntelliSign® electronic signatures and approvals, and much more. Even with such a powerful and full-bodied solution, CobbleStone provides even *more* add-on modules if needed to meet organizations' needs. CobbleStone Contract Insight Enterprise virtually ensures that even the most complex contractual ecosystems are managed seamlessly – with top-tier efficiency, oversight, and support. The Enterprise Edition is available as a SaaS solution or can be easily locally deployed on organizations' servers or corporate cloud.
